2. Without prejudice to paragraph 1, the Parties agree to hold consultations where a Party considers that another Party has taken measures not in conformity with the TBT Agreement which are likely to create, or have created, an obstacle to trade, in order to find an appropriate solution in conformity with the TBT Agreement.

Article 15
Sanitary and Phytosanitary Measures

1. The rights and obligations of the Parties in respect of sanitary and phytosanitary measures shall be governed by the WTO Agreement on the Application of Sanitary and Phytosanitary Measures (hereinafter referred to as “the SPS Agreement”).

Article 17

Article 18
Transit of Goods

The Parties shall ensure free transit of goods, originating in the territory of the State of one Party and transporting through the territory of the State of the other Party, in accordance with national legislation of their States.

Article 19
Bilateral Safeguard Measures

1. Where, as a result of the reduction or elimination of a customs duty under this Agreement, any product originating in a Party is being imported into the territory of another Party in such increased quantities, in absolute terms or relative to domestic production, and under such conditions as to constitute a substantial cause of serious injury or threat thereof to the domestic industry of like or directly competitive products in the territory of the importing Party, the importing Party may take bilateral safeguard measures to the minimum extent necessary to remedy or prevent the injury, subject to the provisions of paragraphs 2 to 10.

2. Bilateral safeguard measures shall only be taken upon clear evidence that increased imports have caused or are threatening to cause serious injury pursuant to an investigation in accordance with the procedures laid down in Articles 3 and 4 of the WTO Agreement on Safeguards.

3. The Party intending to take a bilateral safeguard measure under this Article shall immediately, and in any case before taking a measure, make notification to the other Party. The notification shall contain all pertinent information, which shall include evidence of serious injury or threat thereof caused by increased imports, a precise description of the product involved and the proposed measure, as well as the proposed date of introduction, expected duration and timetable for the progressive removal of the measure.

4. If the conditions set out in paragraph 1 are met, the importing Party may take measures consisting in increasing the rate of customs duty for the product to a level not to exceed the lesser of:

- (a) the MFN rate of duty applied at the time the action is taken; or
- (b) the MFN rate of duty applied on the day immediately preceding the date of the entry into force of this Agreement.

5. Bilateral safeguard measures shall be taken for a period not exceeding two years. In very exceptional circumstances, after review by the joint Free Trade Committee (referred to in Article 55), measures may be taken up to a total maximum period of three years. No bilateral safeguard measures shall be applied to the import of a product which has previously been subject to such a measure.

6. The Committee shall, within 30 days from the date of notification, examine the information provided under paragraph 3 in order to facilitate a mutually acceptable resolution of the matter. In the absence of such resolution, the importing Party may adopt a measure

pursuant to paragraph 4 to remedy the problem, and, in the absence of mutually agreed compensation, the Party against whose product the measure is taken may take compensatory action. In the selection of the bilateral safeguard measure and the compensatory action, priority must be given to the measure which least disturbs the functioning of this Agreement. The compensatory action shall normally consist of suspension of concessions having substantially equivalent trade effects or concessions substantially equivalent to the value of the additional duties expected to result from the bilateral safeguard measure. The Party taking compensatory action shall apply the action only for the minimum period necessary to achieve the substantially equivalent trade effects and in any event, only while the bilateral safeguard measure under paragraph 4 is being applied.

7. Upon the termination of the bilateral safeguard measure, the rate of customs duty shall be the rate which would have been in effect before the measure.

8. In critical circumstances, where delay in the introduction of a bilateral safeguard measure in accordance with this Article would cause damage which would be difficult to repair, a Party may take a provisional bilateral safeguard measure pursuant to a preliminary determination that there is clear evidence that increased imports constitute a substantial cause of serious injury, or threat thereof, to the domestic industry. The Party intending to take such a measure shall immediately notify the other Party. Within 30 days of the date of the notification, the procedures set out in paragraphs 2 to 6, including for compensatory action, shall be initiated. Any compensation shall be based on the total period of application of the provisional bilateral safeguard measure and of the bilateral safeguard measure.

9. Any provisional bilateral safeguard measure shall be terminated within 200 days at the latest. The period of application of any such provisional bilateral safeguard measure shall be counted as part of the duration of the bilateral safeguard measure set out in paragraph 5 and any extension thereof. Any tariff increases shall be promptly refunded if the investigation described in paragraph 2 does not result in a finding that the conditions of paragraph 1 are met.

10. Five years after the date of entry into force of this Agreement, the Parties shall review in the Committee whether there is need to maintain the possibility to take bilateral safeguard measures between them. If the Parties decide, after the first review, to maintain such possibility, they shall thereafter conduct biennial reviews of this matter in the Committee.

Article 20

Global Safeguard Measures

1. If a product is being imported, irrespective of its origin, in such increased quantities, absolute or relative to domestic production, and under such conditions as to cause or threaten to cause serious injury to the domestic industry that produces like or directly competitive products each Party has a right to apply safeguard measures to such products according to Article XIX of the GATT 1994 and WTO Agreement on Safeguards.

2. For imports of goods originating from the territory of one of the Parties to the

territory of the other Party that do not cause or threaten to cause serious injury to the domestic industry producing like or directly competing goods of the importing Party, the safeguard measures with respect to imports of such goods do not apply.

3. At the request of the other Party and/or provided that it has a substantial interest the Party intending to take safeguard measures shall provide immediately ad hoc written notification of all pertinent information on the initiation of the safeguard investigation, the provisional findings and the final findings of the investigation.

4. For the purpose of this Article, it is considered that a Party has a substantial interest when it is among the five largest suppliers of the imported goods during the most recent three-year period of time, measured in terms of either absolute volume or value.

5. The Parties, in selecting measures relating to this Article, give priority to those measures which cause minimal economic injury and do not create serious obstacles to the implementation of this Agreement.

Article 21 *Antidumping and Countervailing Measures*

1. Both Parties agree that anti-dumping and countervailing measures should be used in full compliance with Article VI of GATT 1994, WTO Agreement on Implementation of Article VI of GATT 1994 and WTO Agreement on Subsidies and Countervailing Measures and should be based on a fair and transparent system.

2. Immediately after any imposition of provisional measures and before the final decision is taken, the Parties shall ensure full and meaningful disclosure of all essential facts and considerations which form the basis for the decision to apply these measures. Disclosures shall be made in writing and allow interested parties sufficient time to respond with comments. After final disclosure interested parties shall be given at least ten days to make these comments. Each interested party shall be granted the possibility to express their views during an anti-dumping investigation.

3. Should a Party decide to impose an anti-dumping duty, the amount of such duty shall not exceed the margin of dumping and should be less than the margin if such a lesser duty is adequate to remove the injury to the domestic industry.

4. The Party which is subject to anti-dumping measures imposed by the other Party has the right to request consultations in order to discuss the impact of the anti-dumping measures on bilateral trade and review national anti-dumping legislation.

Article 22 *Procedure for consultation and application of measures*

1. Prior to the application of measures envisaged in Articles 19 and/or 21 of this Agreement, the Parties shall seek a resolution of differences through consultations within the Committee referred in Article 55 of this Agreement.

2. If this Committee is unable to reach a mutually acceptable solution within thirty days of the date of initiating these consultations, the Party that initiated the procedure to introduce measures envisaged in Articles 19 and/or 21, is entitled to take such measures aimed at removing the serious injury, or threat of serious injury, and shall notify the other Party in advance. The extent and the period of application of the measures shall be limited as far as it is necessary to remove the injury.

3. In exceptional cases, when the delay of application of measures envisaged in Articles 19 and/or 21 of this Agreement may lead to injury being difficult to remedy, the Party shall inform the Committee before applying provisional measures without prior consultations. Such consultations shall be immediately initiated after taking such action.

Article 23 ***Balance of Payments***

1. The Parties shall endeavour to avoid the imposition of restrictive measures for balance of payments purposes.

2. A Party in serious balance of payments difficulties, or under imminent threat thereof, may, in accordance with the conditions established under the GATT 1994 and the WTO Understanding on the Balance of Payments Provisions of the GATT 1994, adopt trade restrictive measures, which shall be of limited duration and non-discriminatory, and may not go beyond what is necessary to remedy the balance of payments situation.

3. The Party introducing a measure under this Article shall promptly notify the other Party thereof.

Article 24 ***State Trading Enterprises***

The rights and obligations of the Parties in respect of state trading enterprises shall be governed by Article XVII of the GATT 1994 and the Understanding on the Interpretation of Article XVII of the GATT 1994, which are hereby incorporated into and made part of this Agreement.

2. The arbitration panel shall examine the matter referred to it in the request for the establishment of an arbitration panel in the light of the relevant provisions of this Agreement interpreted in accordance with rules of interpretation of public international law.

3. Unless the parties to the dispute agree otherwise, the hearings of the arbitration panel shall take place in Geneva. The language of any proceeding shall be English. The hearings of the arbitration panel shall be open to the public unless the parties to the dispute agree otherwise.

4. There shall be no *ex parte* communications with the arbitration panel concerning matters under its consideration.

5. A Party's written submissions, written versions of oral statements and responses to questions put by an arbitration panel, shall, at the same time as it is submitted to the arbitration panel, be transmitted by that Party to the other party to the dispute.

6. The Parties shall treat as confidential the information submitted by other Party to the arbitration panel which that Party has designated as confidential.

7. Decisions of the arbitration panel shall be taken by a majority of its members. Any member may furnish separate opinions on matters not unanimously agreed. The arbitration panel may not disclose which members are associated with majority or minority opinions.

Article 50 ***Arbitration Panel Reports***

1. The arbitration panel should, as a general rule, submit an initial report containing its findings and ruling to the parties to the dispute not later than 90 days from the date of establishment of the arbitration panel. In no case should it do so later than five months

from this date. A party to the dispute may submit written comments to the arbitration panel on its initial report within 14 days of receipt of the report. The arbitration panel shall present to the parties to the dispute a final report within 30 days of their receipt of the initial report.

2. The final report, as well as any ruling under Articles 52 and 53, shall be communicated to the Parties. The reports shall be made public, unless the parties to the dispute decide otherwise.

3. Any ruling of the arbitration panel under any provision of this Chapter shall be final and binding upon the parties to the dispute.

Article 51

Suspension or Termination of Arbitration Panel Proceedings

1. Where the parties to the dispute agree, an arbitration panel may suspend its work at any time for a period not exceeding 12 months. If the work of an arbitration panel has been suspended for more than 12 months, the arbitration panel's authority for considering the dispute shall lapse unless the parties to the dispute agree otherwise.

2. A complaining Party may withdraw its complaint at any time before the final report has been issued. Such withdrawal is without prejudice to its right to introduce a new complaint regarding the same issue at a later point in time.

3. The parties to the dispute may agree at any time to terminate the proceedings of an arbitration panel established under this Agreement by jointly notifying the Chairperson of that arbitration panel.

4. An arbitration panel may, at any stage of the proceedings prior to release of the final report, propose that the parties to the dispute seek to settle the dispute amicably.

Article 52

Implementation of Final Report

1. The Party concerned shall promptly comply with the ruling of the arbitration panel. If it is impracticable to comply immediately, the parties to the dispute shall endeavour to agree on a reasonable period of time to do so. In the absence of such agreement within 30 days from the date of the issuance of the final report, either party to the dispute may request the original arbitration panel to determine the length of the reasonable period of time, in light of the particular circumstances of the case. The ruling of the arbitration panel should be given within 30 days from that request.

2. The party to the dispute concerned shall notify the other party to the dispute of the measure adopted in order to comply with the ruling of the arbitration panel, as well as provide a detailed description of how the measure ensures compliance sufficient to allow the other party to the dispute to assess the measure.

3. In case of disagreement as to the existence of a measure complying with the ruling of the arbitration panel or to the consistency of that measure with the ruling of the arbitration panel, such dispute shall be decided by the same arbitration panel before compensation can be sought or suspension of benefits can be applied in accordance with Article 53. The ruling of the arbitration panel shall normally be rendered within 90 days.

Article 53 ***Compensation and Suspension of Benefits***

1. If the Party concerned fails to properly comply with the ruling in the final report within a reasonable period of time as provided for in paragraph 1 of Article 52, that Party shall, if so requested by the complaining Party, enter into consultations with a view to agreeing on a mutually acceptable compensation. If no such agreement has been reached within 20 days from the request, the complaining Party shall be entitled to suspend the application of benefits granted under this Agreement but only equivalent to those affected by the measure or matter that the arbitration panel has found to be inconsistent with this Agreement.

2. In considering what benefits to suspend, the complaining Party should first seek to suspend benefits in the same sector or sectors as that affected by the measure or matter that the arbitration panel has found to be inconsistent with this Agreement. The complaining Party that considers it is not practicable or effective to suspend benefits in the same sector or sectors may suspend benefits in other sectors.

3. The complaining Party shall notify the other party to the dispute of the benefits which it intends to suspend, the grounds for such suspension and when suspension will commence, no later than 30 days before the date on which the suspension is due to take effect. Within 15 days from that notification, the Party complained against may request the original arbitration panel to rule on whether the benefits which the complaining Party intends to suspend are equivalent to those affected by the measure found to be inconsistent with this Agreement, and whether the proposed suspension is in accordance with paragraphs 1 and 2. The ruling of the arbitration panel shall be given within 45 days from that request. Benefits shall not be suspended until the arbitration panel has issued its ruling.

4. Compensation and suspension of benefits shall be temporary measures and shall only be applied by the complaining Party until the measure or matter found to be inconsistent with this Agreement has been withdrawn or amended so as to bring it into conformity with this Agreement, or until the parties to the dispute have resolved the dispute otherwise.

5. At the request of a party to the dispute, the original arbitration panel shall rule on the conformity with the final report of any implementing measures adopted after the suspension of benefits and, in light of such ruling, whether the suspension of benefits should be terminated or modified. The ruling of the arbitration panel shall be given within 30 days from the date of that request.

Article 54
Other Provisions

1. Whenever possible, the arbitration panel referred to in Articles 52 and 53 shall comprise the same panelists who issued the final report. It shall not be necessary that such materials have undergone sufficient working or processing.

Article 4

Cumulation in Ukraine

Without prejudice to the provisions of Article 2(2), products shall be considered as originating in Ukraine if such products are obtained there, incorporating materials originating in Montenegro, provided that the working or processing carried out in Ukraine goes beyond the operations referred to in Article 7. It shall not be necessary that such materials have undergone sufficient working or processing.

Article 5

or

(b) it is demonstrated to the satisfaction of the customs authorities that a certificate of origin EUR.1 was issued but was not accepted at importation for technical reasons.

2. For the implementation of paragraph 1, the exporter must indicate in his application the place and date of exportation of the products to which the certificate of origin EUR.1 relates, and state the reasons for his request.

3. The customs authorities of the exporting country may issue a certificate of origin EUR.1 retrospectively only after verifying that the information supplied in the exporter's application agrees with that in the corresponding file.

4. Certificates of origin EUR.1 issued retrospectively must be endorsed with the following phrase in English:
'ISSUED RETROSPECTIVELY'

5. The endorsement referred to in paragraph 4 shall be inserted in the "Remarks" box of the certificate of origin EUR.1.

Article 19

Issue of a duplicate certificate of origin EUR.1

1. In the event of theft, loss or destruction of a certificate of origin EUR.1, the exporter may apply to the customs authorities of the exporting country which issued it for a duplicate made out on the basis of the export documents in their possession.

2. The duplicate issued in this way must be endorsed with the following word in English:

'DUPLICATE'

3. The endorsement referred to in paragraph 2 shall be inserted in the "Remarks" box of the duplicate certificate of origin EUR.1.

4. The duplicate, which must bear the date of issue of the original certificate of origin EUR.1, shall take effect as from that date.

Article 20

Issue of certificates of origin EUR.1 on the basis of a proof of origin issued or made out previously

When originating products are placed under the control of a customs office in Montenegro or in Ukraine, it shall be possible to replace the original proof of origin by one or more certificates of origin EUR.1 for the purpose of sending all or some of these products elsewhere within Montenegro or Ukraine. The replacement certificate(s) of origin EUR.1 shall be issued by the customs office under whose control the products are placed.

Article 21

Accounting segregation

1. Where considerable cost or material difficulties arise in keeping separate stocks of originating and non-originating materials which are identical and interchangeable, the customs authorities may, at the written request of those concerned, authorise the so-called "accounting segregation" method to be used for managing such stocks.

2. This method must be able to ensure that, for a specific reference-period, the number of products obtained which could be considered as "originating" is the same as that which would have been obtained if there had been physical segregation of the stocks.

3. The customs authorities may grant such authorisation, subject to any conditions deemed appropriate.

4. This method is recorded and applied on the basis of the general accounting principles applicable in the country where the product was manufactured.

5. The beneficiary of this facilitation may issue or apply for proofs of origin, as the case may be, for the quantity of products which may be considered as originating. At the request of the customs authorities, the beneficiary shall provide a statement of how the quantities have been managed.

6. The customs authorities shall monitor the use made of the authorisation and may withdraw it at any time whenever the beneficiary makes improper use of the authorisation in any manner whatsoever or fails to fulfil any of the other conditions laid down in this Annex.

Article 22

Conditions for making out an invoice declaration

1. An invoice declaration as referred to in Article 16(1)(b) may be made out:

(a) by an approved exporter within the meaning of Article 23,

or

(b) by any exporter for any consignment consisting of one or more packages containing originating products whose total value does not exceed EUR 6,000.

2. An invoice declaration may be made out if the products concerned can be considered as products originating in Montenegro or in Ukraine and fulfil the other requirements of this Annex.

3. The exporter making out an invoice declaration shall be prepared to submit at any time, at the request of the customs authorities of the exporting country, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Annex.

4. An invoice declaration shall be made out by the exporter by typing, stamping or printing on the invoice, the delivery note or another commercial document, the declaration, the text of which appears in Appendix IV, using one of the linguistic versions set out in that Appendix and in accordance with the provisions of the domestic law of the exporting country. If the declaration is hand-written, it shall be written in ink in printed characters.

5. Invoice declarations shall bear the original signature of the exporter in manuscript. However, an approved exporter within the meaning of Article 23 shall not be required to sign such declarations provided that he gives the customs authorities of the exporting country a written undertaking that he accepts full responsibility for any invoice declaration which identifies him as if it had been signed in manuscript by him.

6. An invoice declaration may be made out by the exporter when the products to which it relates are exported, or after exportation on condition that it is presented in the importing country no longer than two years after the importation of the products to which it relates.

Article 23

Approved exporter

1. The customs authorities of the exporting country may authorise any exporter, hereinafter referred to as 'approved exporter', who makes frequent shipments of products under this Agreement to make out invoice declarations irrespective of the value of the products concerned. An exporter seeking such authorisation must offer to the satisfaction of the customs authorities all guarantees necessary to verify the originating status of the products as well as the fulfilment of the other requirements of this Annex.

2. The customs authorities may grant the status of approved exporter subject to any conditions which they consider appropriate.

3. The customs authorities shall grant to the approved exporter a customs authorisation number which shall appear on the invoice declaration.

4. The customs authorities shall monitor the use of the authorisation by the approved exporter.

5. The customs authorities may withdraw the authorisation at any time. They shall do so where the approved exporter no longer offers the guarantees referred to in paragraph 1, no longer fulfils the conditions referred to in paragraph 2 or otherwise makes an incorrect use of the authorisation.

Article 24

Validity of proof of origin

1. A proof of origin shall be valid for six months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.

2. Proofs of origin which are submitted to the customs authorities of the importing country after the final date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

Article 25

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 26

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonized System falling within Sections XVI and XVII or headings 7308 and 9406 of the Harmonized System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

Article 27

Exemptions from proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a proof of origin, provided that such products are not imported by way of trade

and have been declared as meeting the requirements of this Annex and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document, which should be accepted by customs authorities.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1,200 in the case of products forming part of travellers' personal luggage.

Article 28

Supporting documents

The documents referred to in Articles 17(3) and 22(3) used for the purpose of proving that products covered by a certificate of origin EUR.1 or an invoice declaration can be considered as products originating in Montenegro or in Ukraine and fulfil the other requirements of this Annex may consist *inter alia* of the following:

- (a) direct evidence of the processes carried out by the exporter or supplier to obtain the goods concerned, contained for example in his accounts or internal book-keeping;
- (b) documents proving the originating status of materials used, issued or made out in Montenegro or in Ukraine where these documents are used in accordance with domestic law;
- (c) documents proving the working or processing of materials in Montenegro or in Ukraine, issued or made out in Montenegro or in Ukraine, where these documents are used in accordance with domestic law;
- (d) certificates of origin EUR.1 or invoice declarations proving the originating status of materials used, issued or made out in Montenegro or in Ukraine in accordance with this Annex;
- (e) appropriate evidence concerning working or processing undergone outside Montenegro or Ukraine by application of Article 12, proving that the requirements of that Article have been satisfied

Article 29

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of a certificate of origin EUR.1 shall keep for at least three years the documents referred to in Article 17(3).

2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 22(3).

3. The customs authorities of the exporting country issuing a certificate of origin EUR.1 shall keep for at least three years the application form referred to in Article 17(2).
4. The customs authorities of the importing country shall keep for at least three years the certificates of origin EUR.1 and the invoice declarations submitted to them.

Article 30

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.
2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 31

Amounts expressed in euro

1. For the application of the provisions of Article 22(1)(b) and Article 27(3) in cases where products are invoiced in a currency other than euro, amounts in the national currencies of Montenegro and of Ukraine equivalent to the amounts expressed in euro shall be fixed annually by the Parties.
2. A consignment shall benefit from the provisions of Article 22(1)(b) or Article 27(3) by reference to the currency in which the invoice is drawn up, according to the amount fixed by the Parties.
3. The amounts to be used in any given national currency shall be the equivalent in that currency of the amounts expressed in euro as at the first working day of October. The amounts shall be communicated BY the Parties to each other by 15 October and shall apply from 1 January the following year.
4. A country may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 per cent. A country may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 per cent in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.
5. The amounts expressed in euro shall be reviewed by the Free Trade Committee at the request of Montenegro or of Ukraine. When carrying out this review, the Free Trade Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI
ARRANGEMENTS FOR ADMINISTRATIVE CO-OPERATION

Article 32
Mutual assistance

1. The customs authorities in Montenegro and in Ukraine shall provide each other with specimen impressions of stamps used for the issue of certificates of origin EUR.1 and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.
2. In order to ensure the proper application of this Annex, Montenegro and Ukraine shall assist each other, through the competent customs authorities, in checking the authenticity of the certificates of origin EUR.1 or the invoice declarations and the correctness of the information given in these documents.

Article 33
Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Annex.
2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the certificate of origin EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof of origin is incorrect shall be forwarded in support of the request for verification.
3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.
4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.
5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in Montenegro or in Ukraine and fulfil the other requirements of this Annex.
6. If in cases of reasonable doubt there is no reply within ten months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting

customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

Article 34

Dispute settlement

1. Where disputes arise in relation to the verification procedures of Article 33 which cannot be settled between the customs authorities requesting verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Annex, they shall be submitted to the Free Trade Committee.
2. In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

Article 35

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 36

Free zones

Products which are imported from the free zones of either contracting parties shall be excluded from preferential treatment under the Montenegrin-Ukrainian free trade Agreement.

TITLE VII
FINAL PROVISIONS

Article 37

Amendments to the Annex

The Parties may amend this Annex after entry into force through mutual consent. Any amendment made to this Annex shall enter into force according to the provisions of Article 29 of the Free Trade Agreement between both Parties and shall constitute an integral part of the Annex.

APPENDIX I

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1 — General introduction

This Annex lays down under which products shall be considered to originate in the beneficiary country concerned. There are four different types of rule, which vary according to the product:

- (a) through working or processing a maximum content of non-originating materials is not exceeded;
- (b) through working or processing the 4-digit Harmonized System heading or 6-digit Harmonized System sub-heading of the manufactured products becomes different from the 4-digit Harmonized System heading or 6-digit sub-heading respectively of the materials used;
- (c) a specific working and processing operation is carried out;
- (d) working or processing is carried out on certain wholly obtained materials.

Note 2 — The structure of the list

2.1 Columns 1 and 2 describe the product obtained. Column 1 gives the chapter number, 4-digit heading or 6-digit sub-heading number used in the Harmonized System, as appropriate. Column 2 gives the description of goods used in that system for that heading or chapter. For each entry in columns 1 and 2, subject to Note 2.4, one or more rules ("qualifying operations") are set out in column 3. These qualifying operations concern only non-originating materials. Where, in some cases, the entry in column 1 is preceded by "ex", this signifies that the rule in column 3 applies only to the part of that heading as described in column 2.

2.2 Where several Harmonized System headings or sub-headings are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rule in column 3 applies to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings or sub-headings grouped together in column 1.

2.3 Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rule in column 3.

2.4 Where two alternative rules are set out in column 3, separated by "or", it is at the choice of the exporter which one to use.

Note 3 — General provisions concerning certain agricultural goods

3.1 Agricultural goods falling within Chapters 6, 7, 8, 9, 10, 12 and heading 2401 which are grown or harvested in the territory of a beneficiary country shall be treated as originating in the territory of that country, even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds, or other live parts of plants imported from another country.

3.2 In cases where the content of non originating sugar in a given product is subject to limitations, the weight of sugars of headings 1701 (sucrose) and 1702 (e.g., fructose, glucose, lactose, maltose, isoglucose or invert sugar) used in the manufacture of the final product and used in the manufacture of the non-originating products incorporated in the final product is taken into account for the calculation of such limitations.

Note 4 — Terminology used in respect of certain textile products

4.1 The term "natural fibres" is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.

4.2 The term "natural fibres" includes horsehair of heading 0503, silk of headings 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203, and other vegetable fibres of headings 5301 to 5305.

4.3 The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

4.4 The term "man-made staple fibres" is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5 — Tolerances applicable to products made of a mixture of textile materials

5.1 Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4)

5.2 However, the tolerance mentioned in Note 6.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,

- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of poly(phenylene sulphide),
- synthetic man-made staple fibres of poly(vinyl chloride),
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605,
- glass fibres,
- metal fibres.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin rules may be used, provided that their total weight does not exceed 10 % of the weight of the yarn.

Example:

A woollen fabric, of heading 5112, made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin rules, or woollen yarn which does not satisfy the origin rules, or a combination of the two, may be used, provided that their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn of heading 5205 and cotton fabric of heading 5210, is only a mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

5.3 In the case of products incorporating "yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped", the tolerance is 20 % in respect of this yarn.

5.3 In the case of products incorporating "strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film", the tolerance is 30 % in respect of this strip.

Note 6 — Other tolerances applicable to certain textile products

6.1 Where, in the list, reference is made to this Note, textile materials which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.

6.2 Materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

6.3 Where a percentage-rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7 — Definition of specific processes and simple operations carried out in respect of certain products of Chapter 27

7.1. For the purposes of headings ex 2707 and 2713, the "specific processes" are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation-process (1);
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation.

7.2. For the purposes of headings 2710, 2711 and 2712, the "specific processes" are the following:

- (a) vacuum-distillation;

- (b) redistillation by a very thorough fractionation-process (1);
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation;
- (j) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur-content of the products processed (ASTM D 1266-59 T method);
- (k) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
- (l) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (m) in respect of fuel oils of heading ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
- (n) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.
- (o) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0,75 % of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.

7.3. For the purposes of headings ex 2707 and 2713, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur-contents, or any combination of these operations or like operations, do not confer origin.

**APPENDIX II – UKRAINE - SCHEDULE OF SPECIFIC COMMITMENTS AND
LISTS OF MFN EXEMPTIONS REFERRED TO IN ARTICLES 41 AND 44⁴**

⁴ The Parties agreed that under this Agreement in Annex III, Ukraine retains its WTO commitments.

Modes of supply: (1) Cross border supply (2) Consumption abroad (3) Commercial presence (4) Presence of natural persons

Sector or sub-Sector	Limitations on market access	Limitations on national treatment	Additional commitments
I. HORIZONTAL COMMITMENTS			
Public Utilities	(3) Services considered as public utilities at a national or local level may be subject to public monopolies or to exclusive rights granted to private operators ⁵ .		
Legal Entities Limitations on branches, agencies and representative offices		(3) Treatment accorded to subsidiaries having their registered office, central administration or principal place of business within Montenegro may not be extended to branches or agencies established in Montenegro. Treatment less favourable may be accorded to subsidiaries with a registered office in Montenegro that cannot show an effective and continuous link with Montenegro's economy.	

⁵ Explanatory Note: Public utilities exist in sectors such as related scientific and technical consulting services, R&D services on social sciences and humanities, technical testing and analysis services, environmental services, health services, transport services and services auxiliary to all modes of transport. Exclusive rights on such services are often granted to private operators, for instance operators with concessions from public authorities, subject to specific service obligations. Given that public utilities often also exist at the sub-central level, detailed and exhaustive sector-specific scheduling is not practical. This limitation does not apply to telecommunications and to computer and related services.

²¹ "Other forms of commercial presence for the supply of international maritime transport services" means the ability for international maritime transport service suppliers of other Members to undertake locally all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery). These activities include, but are not limited to:

- Marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;
- The acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any transport and related services, including inward transport services by any mode, particularly inland waterways, road and rail, necessary for the supply of the integrated services;
- The preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;
- The provision of business information by any means, including computerised information systems and electronic data interchange (subject to the provisions of the annex on telecommunications);
- The setting up of any business arrangements (including participation in the stock of a company) and the appointment of personnel recruited locally (or, in the case of foreign personnel, subject to the horizontal commitment on movement of personnel) with any locally established shipping agency; and

ANNEX I

Understanding on the Scope of Coverage of CPC 84 - Computer and Related Services

1. CPC 84 covers all computer and related services.
2. Technological developments have led to the increased offering of these services as a bundle or package of related services that can include some or all of the basic functions listed in paragraph 3. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.
3. Computer and related services, regardless of whether they are delivered via a network, including the Internet, include all services that provide any of the following or any combination thereof:
 - Consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems;
 - Consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for software²⁹;
 - Data processing, data storage, data hosting or database services;
 - Maintenance and repair services for office machinery and equipment, including computers; and
 - Training services for staff of clients, related to software, computers or computer systems, and not elsewhere classified.
4. In many cases, computer and related services enable the provision of other services³⁰ by both electronic and other means. However, in such cases, there is an important distinction between the computer and related service (e.g., web-hosting or application hosting) and the other service enabled by the computer and related service. The other service, regardless of whether it is enabled by a computer and related service, is not covered by CPC 84.

²⁹ The term "software" may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.

³⁰ E.g., W/120.1.A.b. (accounting, auditing and bookkeeping services), W/120.1.A.d. (architectural services), W/120.1.A.h. (medical and dental services), W/120.2.D (audiovisual services), W/120.5. (educational services).

ANNEX TO THE UNDERSTANDING ON THE SCOPE OF COVERAGE OF CPC 84 COMPUTER AND RELATED SERVICES

CPC Division 84 – Computer and Related Services

- 841 Consultancy services related to the installation of computer hardware.
- 8410 84100 Consultancy services related to the installation of computer hardware:
Assistance services to the clients in the installation of computer hardware (i.e. physical equipment) and computer networks.
- 842 Software implementation services:
All services involving consultancy services on, development and implementation of software. The term "software" may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.
- 8421 84210 Systems and software consulting services:
Services of a general nature prior to the development of data processing systems and applications. It might be management services, project planning services, etc.
- 8422 84220 Systems analysis services:
Analysis services include analysis of the clients' needs, defining functional specification, and setting up the team. Also involved are project management, technical coordination and integration and definition of the systems architecture.
- 8423 84230 Systems design services:
Design services include technical solutions, with respect to methodology, quality-assurance, choice of equipment software packages or new technologies, etc.
- 8424 84240 Programming services:
Programming services include the implementation phase, i.e. writing and debugging programmes, conducting tests, and editing documentation.
- 8425 84250 Systems maintenance services:
Maintenance services include consulting and technical assistance services of software products in use, rewriting or changing existing programmes or systems, and maintaining up-to-date software documentation and manuals. Also included are specialist work, e.g. conversions.
- 843 Data processing services.
- 8431 84310 Input preparation services:
Data recording services such as key punching, optical scanning or other methods for data entry.
- 8432 84320 Data-processing and tabulation services:
Services such as data processing and tabulation services, computer calculating services, and rental services of computer time.

8433 84330 Time-sharing services:

This seems to be the same type of services as 84320. Computer time only is bought; if it is bought from the customer's premises, telecommunications services are also bought. Data processing or tabulation services may also be bought from a service bureau. In both cases the services might be time sharing processed. Thus, there is no clear distinction between 84320 and 84330.

8439 84390 Other data processing services:

Services which manage the full operations of a customer's facilities under contract: computer-room environmental quality control services; management services of in-place computer equipment combinations; and management services of computer work flows and distributions.

844 Database services.

8440 84400 Database services:

All services provided from primarily structured databases through a communication network.

Exclusions: Data and message transmission services (e.g. network operation services, value-added network services) are classified in class 7523 (Data and message transmission services).

Documentation services consisting in information retrieval from databases are classified in subclass 96311 (Library services).

845 Maintenance and repair services of office machinery and equipment including computers.

8450 84500 Maintenance and repair services of office machinery and equipment including computers:

Repair and maintenance services of office machinery, computers and related equipment.

849 Other computer services.

8491 84910 Data preparation services:

Data preparation services for clients not involving data processing services.

8499 84990 Other computer services n.e.c.:

Other computer related services, not elsewhere classified, e.g. training services for staff of clients, and other professional computer services.

ANNEX II

Reference Paper on the Postal and Courier Sector

Scope

The following are definitions and principles on the regulatory framework for all postal and courier services.

Definitions

"Individual licence" is an authorisation, granted to an individual supplier by a regulatory authority, which is required before supplying a given service.

"Universal service" is the permanent provision of a postal service of specified quality at all points in the territory of a Member at affordable prices for all users.

1. Prevention of anti-competitive practices in the postal and courier sector

Appropriate measures will be maintained or introduced for the purpose of preventing suppliers who, alone or together, have the ability to affect materially the terms of participation (having regard to price and supply) in the relevant markets for postal and courier services as a result of use of their position in the market, from engaging in or continuing anti-competitive practices.

2. Universal service

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive per se, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

3. Individual licenses

An individual licence may only be required for services which are within the scope of the universal service.

Where an individual licence is required, the following will be made publicly available:

- (a) All the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and
- (b) The terms and conditions of individual licenses.

The reasons for the denial of an individual licence will be made known to the applicant upon request and an appeal procedure through an independent body will be established. Such a procedure will be transparent, non-discriminatory, and based on objective criteria.

4. Independence of the regulatory body

The regulatory body is legally separate from, and not accountable to, any supplier of postal and courier services. The decisions of and the procedures used by the regulatory body will be impartial with respect to all market participants.

REFERENCE PAPER

Scope

The following are definitions and principles on the regulatory framework for the basic telecommunications services.

Definitions

Users mean service consumers and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network or service that:

- (a) Are exclusively or predominantly provided by a single or limited number of suppliers; and
- (b) Cannot feasibly be economically or technically substituted in order to provide a service.

A major supplier is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in relevant market for basic telecommunications services as a result of:

- (a) Control over essential facilities; or
- (b) Use of its position in the market.

1. Competitive safeguards

1.1. Prevention of anti-competitive practices in telecommunications

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2. Safeguards

The anti-competitive practices referred to above shall include in particular:

- (a) Engaging in anti-competitive cross-subsidization;
- (b) Using information obtained from competitors with anti-competitive results; and
- (c) Not making available to other services suppliers on timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. Interconnection

- 2.1. This section applies to linking with suppliers, providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier, where specific commitments are undertaken.

2.2. Interconnection to be ensured

Interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided.

- (a) Under not-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates;
- (b) In a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- (c) Upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

2.3. Public availability of the procedures for interconnection negotiations

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4. Transparency of interconnection arrangements

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5. Interconnection: dispute settlement

A service supplier requesting interconnection with a major supplier will have recourse, either:

- (a) At any time; or
- (b) After a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.
